PROFESSIONAL SUMMARY

Fullstack Developer with 10+ years of experience designing, building, and maintaining REST APIs and relational data models for web and mobile products across fintech, enterprise distribution, e-learning, and e-commerce. Strong in PHP (Laravel, Yii2, CodeIgniter) and Node.js (Express, NestJS), with database schemas designed from scratch in MySQL and PostgreSQL and hands-on optimization of endpoints returning large datasets. Experienced integrating third-party payment, messaging, SMS, and email APIs, and building multi-tenant architectures that isolate process flows per client. Comfortable owning the surrounding infrastructure: Git workflow, CI/CD pipelines, Docker, AWS EC2/S3, and Apache/Linux server administration. Currently owning backend and API integrations for a financial services client, wiring third-party and CRM integrations and standing up GitHub → cPanel deployment pipelines for a team that previously had no version control.

CORE TECHNICAL SKILLS

Backend Frameworks: Laravel, Yii / Yii2, CodeIgniter, native PHP, Node.js, Express.js, NestJS, FeathersJS, Django

Languages: PHP, JavaScript (ES6+), TypeScript, SQL, Dart, Python (working knowledge), VB.NET

API Design: REST API design, JSON contracts, authentication & authorization (JWT / OAuth), business-rule and transaction-limit enforcement, endpoint optimization for large payloads

Databases: MySQL, PostgreSQL, SQL Server, SQLite, NoSQL, schema design from scratch, query optimization, data migration and extraction

Integrations: Payment gateways, CRM integration, third-party partner APIs, Facebook Messenger and Viber messaging APIs, SMS and email notification providers, internal service APIs, legacy system data extraction

Architecture: Multi-tenant platforms, service integration, legacy modernization and re-platforming

DevOps & Cloud: Git, GitHub, GitLab, Bitbucket, CI/CD and autodeploy pipelines (GitHub → cPanel), Docker, AWS (EC2, S3), cPanel, Apache / Linux server administration

Frontend (supporting): React.js, Vue 3, Angular, Next.js, Nuxt.js, Tailwind CSS, daisyUI, Flutter / Dart, Bootstrap

Practices: Agile / Scrum, sprint planning, code review, technical leadership, knowledge transfer, AI-assisted development, developer workflow modernization, cross-functional requirements gathering

PROFESSIONAL EXPERIENCE

Senior Backend and API Integrations Developer

05/2026 – Present

Vault Outsourcing | Client: My Money House | Remote

- Built the backend APIs for the **Megarewards** website, the **My Money House** website, and the **Somersoft** Investment Analysis System.
- Integrated third-party APIs, including the **iGO Direct** discount offers API, and wired new API integrations into the existing **CRM** to streamline internal workflow.
- Introduced version control for the first time, migrating a manual development workflow and all existing projects onto **GitHub**.
- Built multi-layer automated deployment pipelines (**GitHub → cPanel**) covering both new and existing projects.
- Replaced the legacy development workflow with an optimized, tool-assisted process with **AI** integrated throughout, planned process flows and delivery roadmaps, and ran knowledge-transfer sessions to upskill the team on the new systems and tooling.
- Built the **Megarewards** mobile app against the existing APIs and **CRM** and managed release to the **App Store** and Google Play.
- Modernized the **megarewards.au** website and built reporting dashboards for **Megarewards** and **Somersoft**.
- Built a centralized dashboard platform for **megarewards.au** that consolidates data from **GoHighLevel (GHL)** and **WordPress** and simplifies content management.

Software Engineer (Full Stack) 01/2025 – 04/2026

Ascendion | Project Staff assigned to Maya Philippines (fintech) | Metro Manila, Philippines

Frontend Web Developer (React / Node) — Online Acceptance & Merchant (OAM) | 01/2025 – 04/2026

- Implemented the Installments feature for the **PayMaya** web portal in **React** and **Node.js**, encoding eligibility rules, feature-set constraints, and transaction limits defined by product and compliance.
- Integrated internal service APIs into a large legacy codebase, conforming to the company's established service architecture and design patterns.
- Coordinated API contracts and requirements with backend, product, QA, and business teams each sprint in a regulated fintech environment.

Flutter Developer — E-Commerce (E-COMM) | 07/2025 – 01/2026

- Integrated internal service APIs behind the Bills payment feature for the **Maya Business App** (**MBM 3.0**), porting service calls from the legacy native application.

Senior Developer (Backend & Mobile) 05/2024 – 04/2025

Diversified Robotics | Remote, US-based company

- Designed, built, and maintained the backend **REST APIs** powering the **WMATA** train and bus monitoring apps, covering data models, endpoints, and integration with external transit data sources.
- Implemented the authentication and authorization flows shared across the mobile applications and the companion web app.
- Delivered the cross-platform iOS and Android client consuming those APIs, keeping payload design aligned with screen requirements.

Mobile Applications Development Lead 08/2021 – 09/2024

Rebisco Biscuit Corporation | Quezon City, Philippines

- Owned the **Laravel** backend for **RDMS** Mobile v2, the API layer behind the company's nationwide distribution management platform, developing and updating endpoints against sprint requirements.
- Optimized API endpoints that fetched and returned large datasets consumed by field devices.
- Built the upload and download APIs for **Appbox v3**, an internal enterprise app-distribution platform (an in-house **App Store** equivalent) served from company infrastructure.
- Fixed and managed the version control process across the mobile and API repositories, restructuring branches and configuring **CI/CD** pipelines for automated per-branch builds.
- Delivered **Flutter** modules consuming those APIs and maintained existing app features alongside the team.

Lead Web Developer (Full Stack) 04/2020 – 08/2021

Cushyfy Solutions Inc. | Remote | Bonifacio Global City, Philippines

- Architected and built the **Laravel** backend for **Chattee**, a **multi-tenant** automated messaging bot orchestrating Facebook Messenger, Viber, SMS, and email APIs, with a database schema designed from scratch to support distinct process flows per tenant.
- Built the **Laravel** loyalty APIs behind the **TRAQS** merchant loyalty system, integrating live email and SMS notifications and connecting to the client's primary backend for userbase extraction and verification.
- Maintained the **Python/Django** backend for the **Syngenta** e-learning platform and built a reporting module that extracted learner progress and usage statistics.
- Shared maintenance of the **CodeIgniter** backend behind the Taguig property tax payment portal.
- Managed AWS EC2 instances and S3 storage for assigned projects; led the team and ran daily standups.

Lead Web Developer (Full Stack) 07/2015 – 04/2020

Solutionbase Corporation | Quezon City, Philippines

- Built the **AIMS** (Accounting & Inventory Monitoring System) backend in **Yii2** with a **MySQL** schema designed from scratch, later re-platforming it onto Laravel.
- Developed a **Laravel** web service that extracted POS data from legacy **VB.NET** systems into **AIMS** against an existing MySQL database.
- Built the Points Management System backend in **Yii2** with a **MySQL** schema **designed from scratch**.
- Implemented **payment gateway** integrations for client e-commerce sites and built new storefronts on **Laravel**.
- Introduced and rolled out **Git** version control across the company's development cycle, standardizing branching and release workflow.

Freelance Software Developer 04/2013 – 09/2014

Komisyon ng Wikang Filipino & Commission on Audit | Manila / Quezon City, Philippines

- Built a records database and a budgetary tracking system for KWF, and the **RCPPE** inventory reconciliation system for the Commission on Audit, in **VB.NET** with **MySQL** as the shared network data store.

EDUCATION & ADDITIONAL INFORMATION

Bachelor of Science in Computer Science — University of Caloocan City, Caloocan, Philippines 2015

Languages: Filipino (native), English (professional working proficiency, CEFR B2)
